PROFILE

Digital Product Owner with 2+ years of experience across digital product delivery and product ownership, specializing in Motor insurance journeys. Owns digital product scope across TPL, Comprehensive, Smart, and SME lines, from requirements shaping and product discovery through UX validation, delivery, and stakeholder alignment. Strong at bridging business and technology, resolving ambiguity, and driving cross-functional delivery. Management Information Systems background with a strong analytical and technical foundation.

EXPERIENCE

Al Rajhi Takaful

Oct 2025 – Present

Digital Enablement Sr. Analyst Motor Product Owner

Key Achievements

- Owned the redesign of a Motor policy self-service journey, reducing service options by 67% and simplifying the request form to improve usability. (Live)
- Supported a multi-product website revamp across Motor and General insurance, coordinating content review, issue tracking, and delivery with cross-functional teams. (Live)
- Owned the end-to-end redesign of the Motor Claims tracking journey in the mobile app across multiple claim types, improving customer visibility and reducing reliance on support. (In Progress)
- Led UX enhancement of a Motor sales journey to simplify navigation and reduce customer drop-off across the quotation-to-payment flow. (Near Live)
- Owned an express purchase journey for a Motor product line, reducing customer steps, enabling auto-fill from existing customer data, and supporting digital payment methods. (In Development)
- Owned the digital journey for a Motor telematics program, defining requirements for score visibility, reward-tier classification, and cashback across digital channels. (In Progress)
- Led integration of Motor insurance sales into a high-traffic government digital platform to expand digital reach and customer acquisition. (In Development)

Responsibilities

- Own product scope and requirements shaping by reviewing BRDs, identifying gaps, and aligning business needs with technical delivery.
- Review and validate UI/UX designs against product requirements and Motor UX standards before developer handoff.
- Coordinate IT, developers, solution architects, PMO, E-PMO, SMO, QA, UX, and Business Analysts to drive delivery.
- Act as the single point of clarity between business and technology teams, resolving scope conflicts and missed requirements in real time.
- Monitor and proactively resolve production issues affecting live Motor digital services.
- Manage external vendors and consultants to align solutions, negotiate scope, and validate technical approaches.

Digital Enablement Analyst Motor Product Owner

Jul 2025 – Oct 2025

- Assumed Motor product ownership post-GDP, managing scope, backlog, and cross-functional coordination for live digital enhancement projects.
- Bridged business requirements and technical execution across departments to support product delivery.

Graduate Development Program – Digital Track

Jul 2024 – Jul 2025

- Completed 4 structured rotations across Motor Underwriting, RPA, Digital Channels, and Product Owner, gaining full exposure to the Motor insurance product lifecycle.
- Built and deployed 2 end-to-end RPA automation workflows using UiPath, translating user behavior into automated bot sequences.
- Wrote scope documents, prioritized backlogs, and contributed to digital Motor journey enhancements across web and mobile.

Business Schema Trading Company (BST)

Apr 2024 – Jul 2024

Geographic Specialist

- Maintained data accuracy through rigorous entry, validation, and modification of geographic and project records.
- Prepared monthly progress reports for the Etimad platform to ensure transparent project status communication.
- Produced key project documentation to support the project manager in planning and decision-making.
- Contributed system improvement insights to promote continuous enhancement of operational workflows.

Project Coordinator

Jan 2024 – Apr 2024

- Improved process efficiency by 15% through workflow analysis and strategic collaboration with Amanet Jeddah.
- Boosted team productivity by 20% through structured KPI audits and targeted performance assessments.
- Developed project plans and essential documentation aligned with contract requirements and stakeholder expectations.
- Ensured document quality through compliance audits, maintaining project accuracy and deadline adherence.
